2 Year and 3 Months of experience in Microsoft .Net technologies
Technical Skill Set: .Net MVC, C#,ADO.Net, Entity Framework, jQuery, JavaScript, Bootstrap, LINQ, SQL Server, Mysql Server, Node Js API, .Net Web API, Angular, .Net Core, Web Form Application.

CAREER OBJECTIVE

Desire to add value to operations in an organization by leveraging upon my existing knowledge and ensuring the formulation of a conductive team environment and enhancing team spirit.

ROLES AND RESPONSIBILITIES

- Involved in client interaction to capture the business requirements and in system design based on requirements.

SKILLSET

Technologies:	.NET MVC, JavaScript,JQuery, Node JS Api, .Net Web API,.Net Core, Angularsssss.
Programming Language:	C#, SQL, MYSQL, Java Script
Proficiency:	Problem solving, Design Patterns.
Database:	SQL Server 2008-2012
Frameworks:	.Net 4.0, 4.5, Entity Framework & ADO.Net, LINQ
API:	Twilio, Stripe, Mailgun API, FullStream API.
Platform:	Windows 10

WORK EXPERIENCE

- **Currently working with P.S. Intelegencia Analytics Pvt. Ltd. since 30 March 2021.**
- **I have worked with BAANS Consulting Services as a Software Developer since 10 October 2019 to 26 March 2021.**
- **Good experience in .Net (MVC) , Rest API, JavaScript, Jquery, HTML5, Bootstrap ,CSS3 and SQL Server.**

ACHIEVEMENT

- **Got Multiple time Applause award for individual task ownership from day one on the project**

Educational Credentials

Professional / Technical

Diploma in Digital Transformation From NIIT Sector 62, Noida
MCA(Master's of Computer Application) in**2019**, securing 1st division
(Indira Gandhi National Open University, Noida UP)
BCA(Bachelor of Computer Application) in**2015**, securing 1st division
(Dr. Bhimrao Ambedkar University, Agra UP)

Academic

12th (Non Medical) in **2012**, from UP Board
10th in **2010**, from UP Board

Projects Handled:

□ **GoForClose (Real Estate)**(**Oct 2019 to Aug 2020**)
Description:
- GoForClose is an web application which is used to upload the file related to property data and we can retrieve the property owner's contact details by using third party API. And we also create the .Net Web API to reuse the code which is used in other system. We can also export data from GoForClose's one site to another site related to this application. And in its new module, I have created Node Js API to follow this File uploading process. In this project, we integrate Stripe API for the payment process and Twilio API for calling and send messages.
- We have also created .Net Console Applications to proccessed this data in background. And also work on Online Google Sheet API for read and write operations.

Technologies: C#.Net MVC , .Net Web Api, Node Js API,SQL Server, MYSQL Server, HTML , Bootstrap, CSS

□ **RPA (Retirement Plan Administration)**(**Aug 2020 to March 2021**)
Description:
- RPA is an web application which is used to make pention plan for retired employees. We capture all the details of that employee about its company details and Contact Details. And accordingly make their pention plans. We are basically converting an MS-Access based system to a Web Application.
- We have make its web application and Web API Application Seperately. We are not using Entity Framework in Web Application because instead of that we have created Web Api project so that we only need to call the API in our Web Application and all kind of Crud operation will be done on that Web API Project.
- In this project we have generated the ITextSharp Report as well.

Technologies: C#.Net MVC , .Net Web Api ,SQL Server, MYSQL Server, HTML , Bootstrap, CSS

Role & Responsibility:
- Participate in requirement gathering & Analysis of requirements.
- Create the Mock-up to finalise the application design and requirement for further discussion.
- Design And Monitor DataBase (SQL Server, MYSQL Server).
- Coordinating with the other Member of the Team .

□ **Midnight Management (April 2021 to till now**)
Description:
- Midnight is a web application which is build on .net technology using Web form framework. This application have sub applications. It is basically used to create order & estimate for printer companies. This software is USA based software and running since year 2008. This project is also using third party API for payment or mailing and also created their own APIs. And they are giving printing press services to the customer and is used to gather information for size , design, margin and colour paper etc to print. First they create estimate and when customer allow then export that estimate in order and proceed to work on that order. And For that order they charge the payment for their services which we received in postage module and also show the over all job schedule for that particular order.
- Recently its sub module is created on Angular name as Print Reach Central which is used to create merchant who can do payment for customer orders which they have placed on Midnight and also created the .net core APIs to link Midnight with Print Reach Central. Because they have provided the facility of Merchants which is third party who can do the payment process of the customer.
- In this project we have generated the Stimulsoft Report as well.

Technologies: C#.Net Web Form , .Net Core Web Application , .Net Core Web Api ,SQL Server, MYSQL Server, HTML , Bootstrap, CSS, Stimulsoft tool, Angular.

Role & Responsibility:
- Participate in requirement gathering & Analysis of requirements.
- Create the Mock-up to finalise the application design and requirement for further discussion.
- Design And Monitor DataBase (SQL Server, MYSQL Server).
- Coordinating with the other Member of the Team .

PERSONAL INFORMATION

Date of Birth	:	11th Dec, 1995
Language Known	:	English,Hindi
Father's Name	:	Mr. Mukesh Kumar Sharma
Sex/MaritalStaus	:	Female/Single
